

# AI in Surveillance

# VIDEO ANOMALY DETECTION

These algorithms look for abnormal behavior in video streams. then these behaviors can be classified as assault, robbery etc.

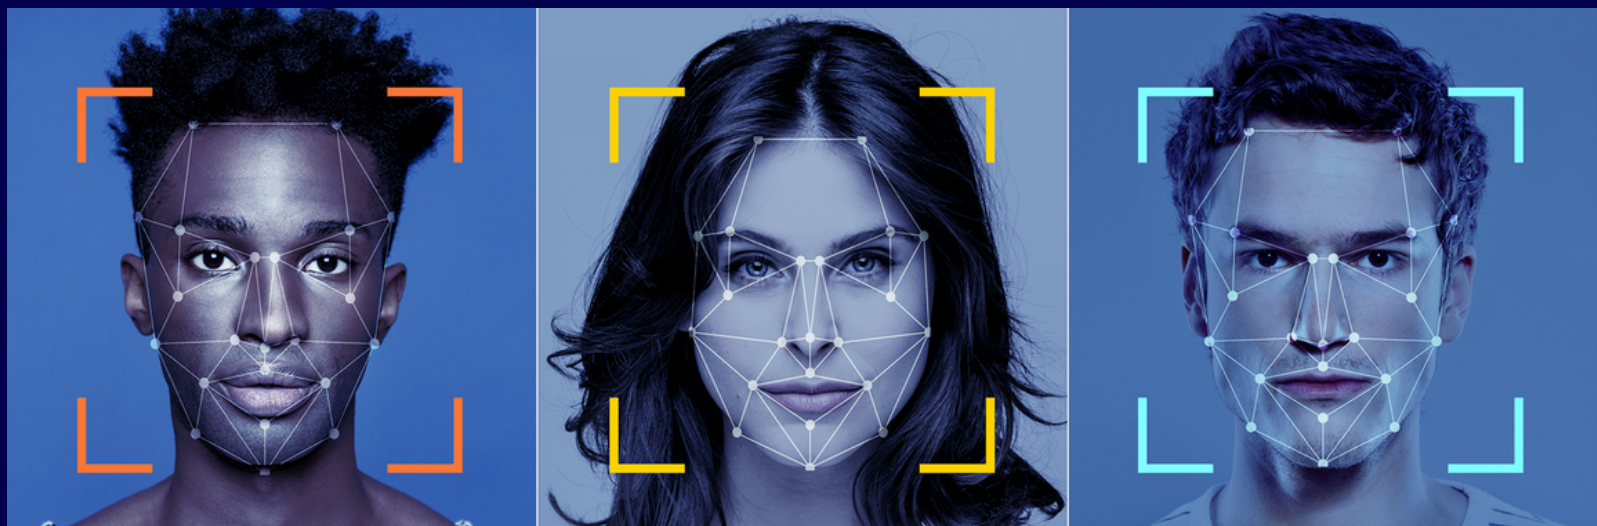

# OBJECT DETECTION & TRACKING

With SOTA Computer Vision Algorithms like YOLO, it has never been easier to detect people and with help of techniques like DeepSORT now we can even track each object

# FACIAL RECOGNITION

There is no explanation needed for this.  
but new AI techniques, now we can  
identify individuals even in a crowd

# WAS THIS HELPFUL?

Be sure to save it so you  
can come back to it later!
